

Portal Settings

The Captive Portal is the login screen your guests see before they connect to Wi-Fi. On this page you manage its **appearance, which details are required to log in**, the **legal texts**, and the **advertisement slots**.

“ **How do I open this screen?** From the left menu, go to **Captive Portal → Portal Settings**.

Note: the panel interface is only partly translated. Where a control still appears in Turkish on screen, the Turkish label is given in brackets so you can find it.

The page has three tabs: **General Settings**, **Theme Settings** and **Advertisements**. The **Preview** on the right reflects every change instantly — you see the result without saving.

Yardım | Şartlar | Gizlilik

1. General Settings

This tab defines the basic behaviour of the portal.

- **Portal Title:** the text shown at the top of the welcome screen — usually your business name.
- **Exit page** (on screen: *Çıkış sayfası*): when *on*, the guest sees the exit page after logging in (your menu, your social media links). When *off*, they are redirected straight to the web address you enter in the **Page Redirect** field that appears underneath.
- **Page Redirect** (on screen: *Sayfa Yönlendirme*): only visible while "Exit page" is off. Enter the address to open after login (for example your corporate website).
- **Terms of Use:** the usage text the guest must accept at login. **Legally required — cannot be switched off.**
- **Hide User Login** (on screen: *Kullanıcı Girişi Gizle*): turn on for special scenarios where the login form should be hidden on the portal.
- **KVKK (data protection):** the personal-data disclosure/consent text. **Legally required — cannot be switched off.**
- **Terminate the session when the page is closed:** turn on if you want the guest's session to end when they close the portal page.
- **Default Language:** the language the portal opens in. The list comes from the **Portal Language Settings** page (Azerbaijan, Bulgaria, China, France, Georgia, Greece, Israel, Italy, Kazakhstan, Netherlands, Poland, Romania, Serbia, South Korea, Spain, Turkey).

Social Media Links

Enter the addresses of your Facebook, Twitter, Pinterest, Instagram and YouTube pages. These icons appear on the welcome screen so guests can reach you in one tap. **Any field you leave empty hides its icon.**

- **Show Instagram card after login:** after the guest completes Wi-Fi login, the exit page shows a prominent card linking to the Instagram address above, plus an "I liked it" confirmation. *The like cannot be verified technically; it is reported as the guest's own statement.*

Wi-Fi Connection (for QR)

Enter your network details so guests can join in a single tap from a QR code.

- **Wi-Fi name (SSID)** (on screen: *WiFi adı (SSID)*): the name of your guest network.
- **Wi-Fi password** (on screen: *WiFi şifresi*): your network password. Leave empty for open networks.
- **Embed Wi-Fi in QR codes** (on screen: *QR kodlarına WiFi'yi göm*): when enabled, scanning a menu or hotel QR code connects the device to the Wi-Fi network automatically.

Confirm your changes with **Save**.

2. Theme Settings

This tab is where you set the visual identity of the portal.

- **Logo Selection:** upload your logo with *Choose file*. Use **Logo Size** to adjust how large it appears on screen.
- **Background Selection:** upload the portal background image. It may be cropped on mobile screens, so choose an image whose key elements sit in the centre.
- **Colour Settings:** six separate colours are defined — **Login Box Colour**, **Button Hover Colour**, **Button Colour**, **Button Text Colour**, **Link Colour** and **Text Colour**. Each is set with a colour picker.
- **Reset Colours:** returns every colour to its default value.
- **Footer text:** free text shown at the bottom of the portal, written in the rich-text editor.

“ **Tip:** the **Captive Portal Preview** panel on the right updates instantly, so you can try colours out without saving.

3. Advertisements

This tab manages the advertisement and announcement content shown on the welcome screen. The list has **Title** and **Status** columns.

Use the + **Advertisements** button to add a new record:

- **Title:** the name of the advert (used to identify it in the admin view).
- **Type:** *Before login* or *After login* — determines at which stage the guest sees the advert.
- **Duration:** how many seconds the advert stays on screen.
- **Content:** the rich-text editor lets you add images, text and links.

Use the **Status** column to switch an advert off without deleting it.

“ **Related pages:** see **Portal Language Settings** for which languages appear on the portal, **SMS Portal Settings** for SMS registration, and **WhatsApp Portal Settings** for WhatsApp registration.
