SMS Portal Settings

What is it for?

The **SMS Portal Settings** screen switches the **Register with SMS** button on the guest login screen on or off and sets what the SMS sign-up form asks for (e-mail, name, coupon code, province and district). The guest types their mobile number and logs in with the password received by SMS.

> **How do I open this screen?** In the left menu, click **Captive Portal → SMS Portal Settings**. *You are here* appears under the title; **Dashboard** in the path line takes you to the home screen.

When do I use it?

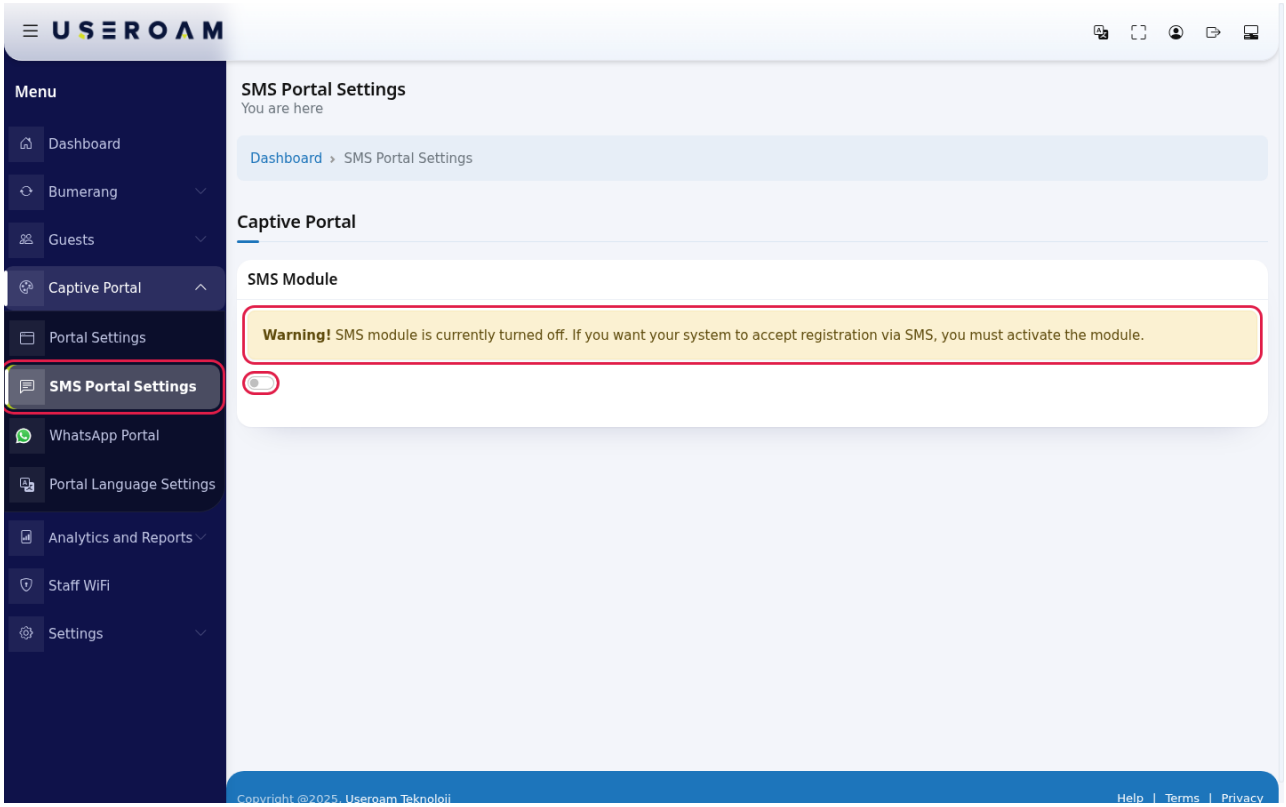

- You want guests to register with their phone number and get online.
- You want to ask for e-mail or name on the sign-up form, optionally as required fields.
- Only guests with a coupon code should be able to register (e.g. codes you hand out to customers).
- You do not want guests online before you approve new sign-ups.

Before you start

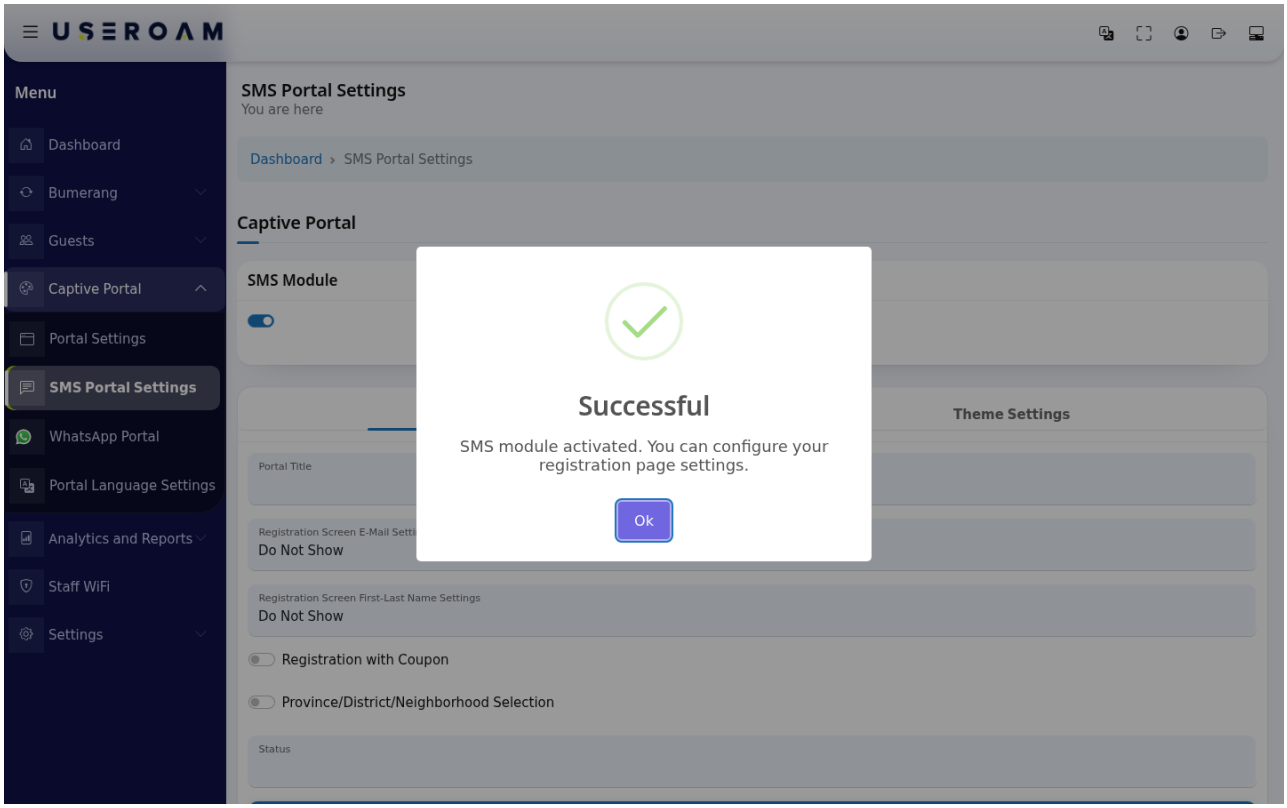

- SMS login works with two screens. This screen turns on the button and the form; the password format, SMS text and the guest group are on Settings → SMS Settings. If that is incomplete, guests get no password.
- If you turn on coupon sign-up, create the codes first on Coupon Codes.
- If you use **Waiting for Approval**, pending sign-ups go to Pending Approval. To get an e-mail about them, the user approval e-mail must be on in Notifications.

Step by step

1. In the left menu, click **Captive Portal → SMS Portal Settings**. If the module is off, the **SMS Module** card shows a switch that is off and this warning: *Warning! SMS module is currently turned off. If you want your system to accept registration via SMS, you must activate the module.*

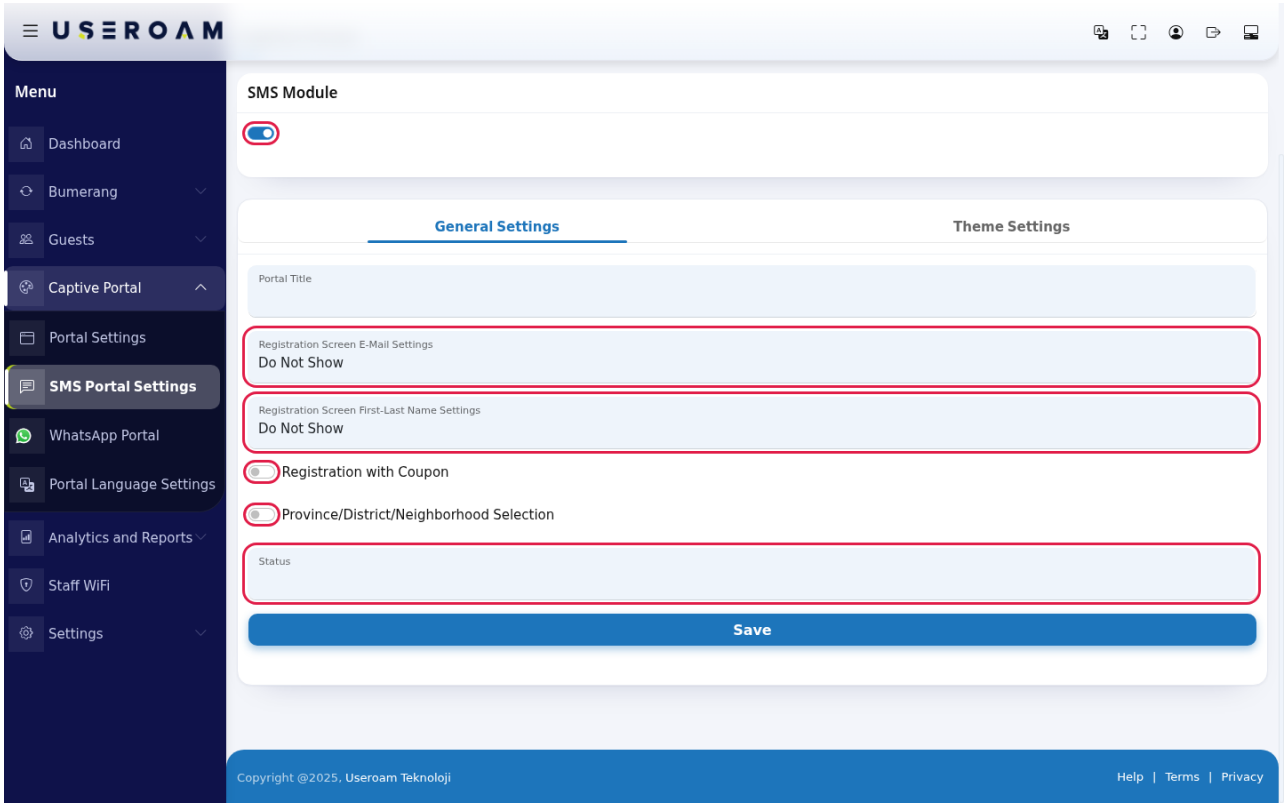

2. Turn the switch on. You do not need to save: it is saved the moment it changes and a **Successful** window says *SMS module activated. You can configure your registration page settings.* Close it with **Ok**. If you turn it off it says *SMS module deactivated.* and the **Register with SMS** button disappears from the login screen.

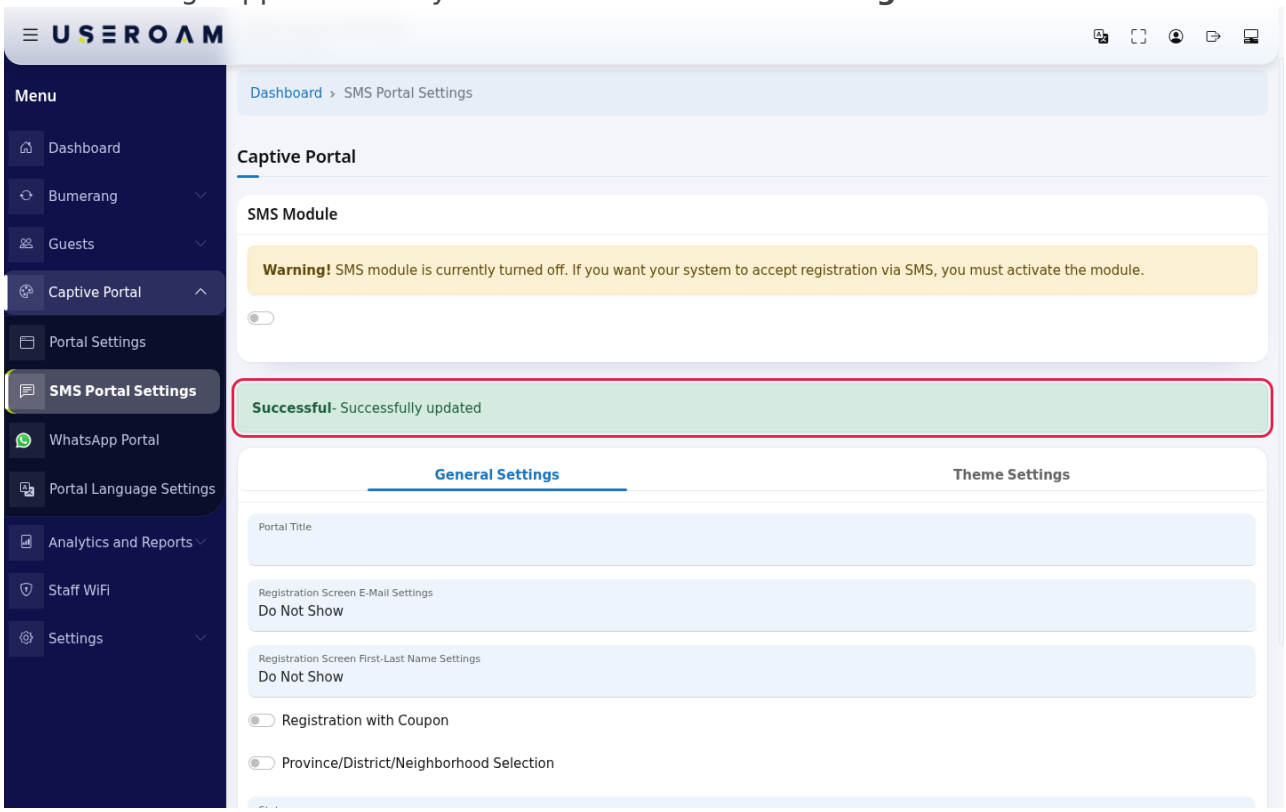

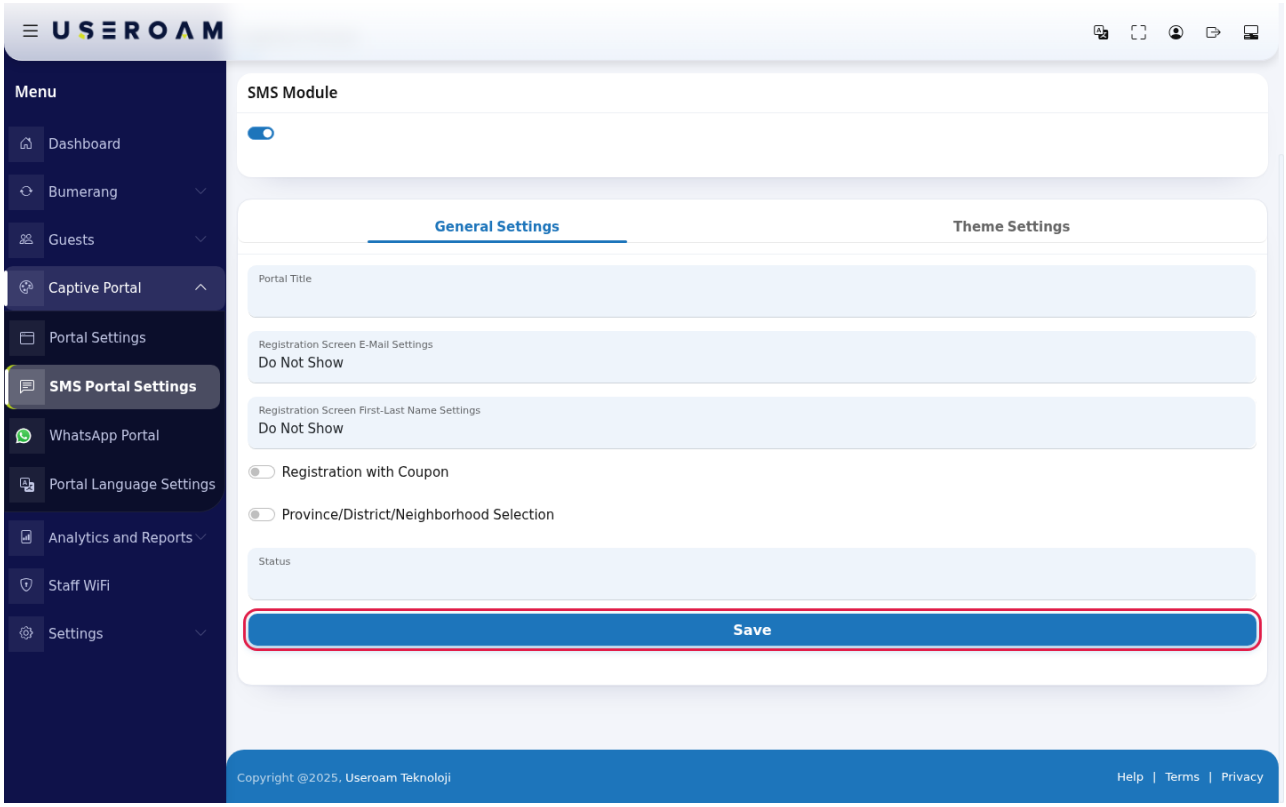

3. With the switch on, the **General Settings** and **Theme Settings** tabs appear below. Set up the sign-up form on **General Settings**:
   - **Registration Screen E-Mail Settings**: **Show** (optional e-mail box), **Show and Required**, **Do Not Show**.
   - **Registration Screen First-Last Name Settings**: the same three options for the first and last name boxes.
   - **Registration with Coupon**: asks for a coupon code; a wrong code blocks the sign-up.
   - **E-mail delivery permission**: only appears while the e-mail box is shown. It is meant to control the commercial message consent box. Note: on the login screen that box is shown when your business has the Bumerang (marketing) licence; this switch alone does not decide it.
   - **Province/District/Neighborhood Selection**: asks for province, district and neighbourhood.
   - **Status**: what happens to new sign-ups. **Active**: the guest gets a password and logs in right away. **Waiting for Approval** or **Passive**: the sign-up waits for your approval; the password is sent when you approve.

To show the form that appears with the switch on, this image was produced on the demo account without pressing the switch.

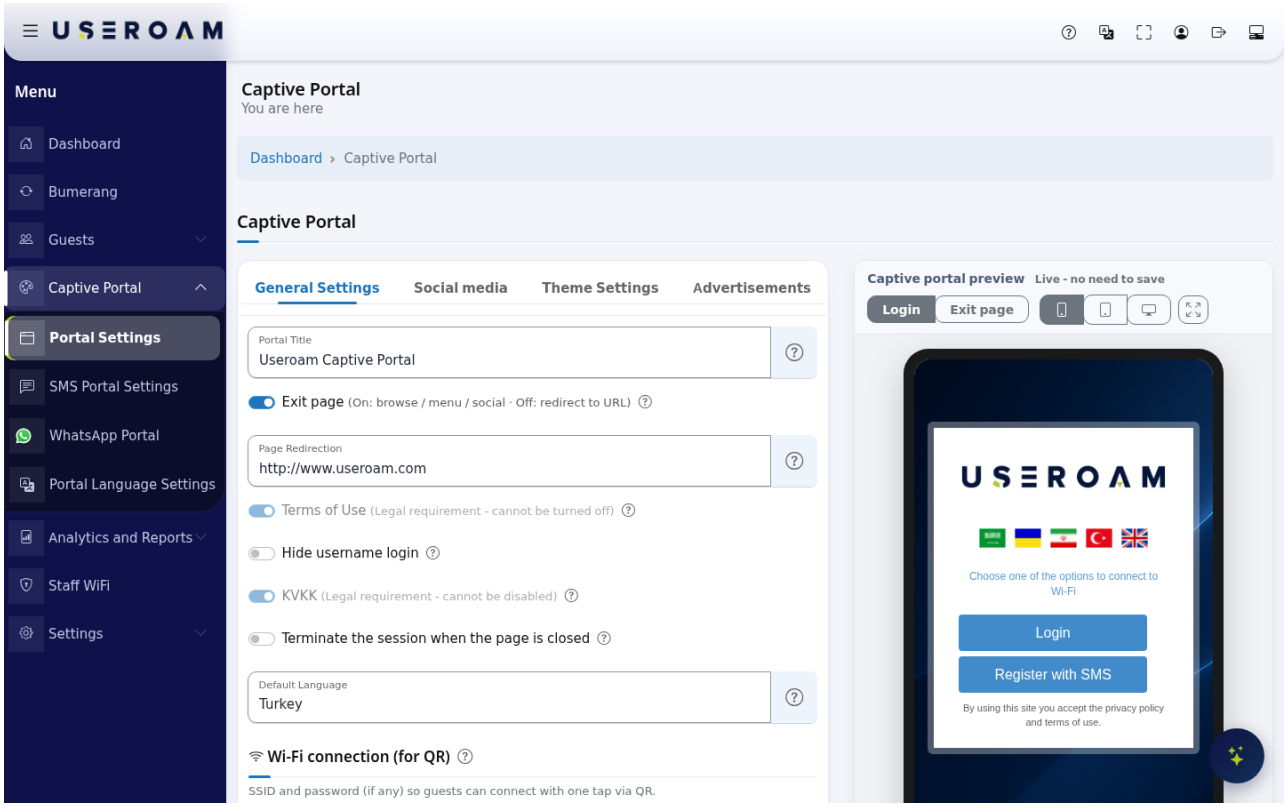

4. Press **Save** at the bottom of the tab. The page reloads, your choices stay in place and a green *Successful- Successfully updated* message appears above the settings card. The same message appears when you save on the **Theme Settings** tab.

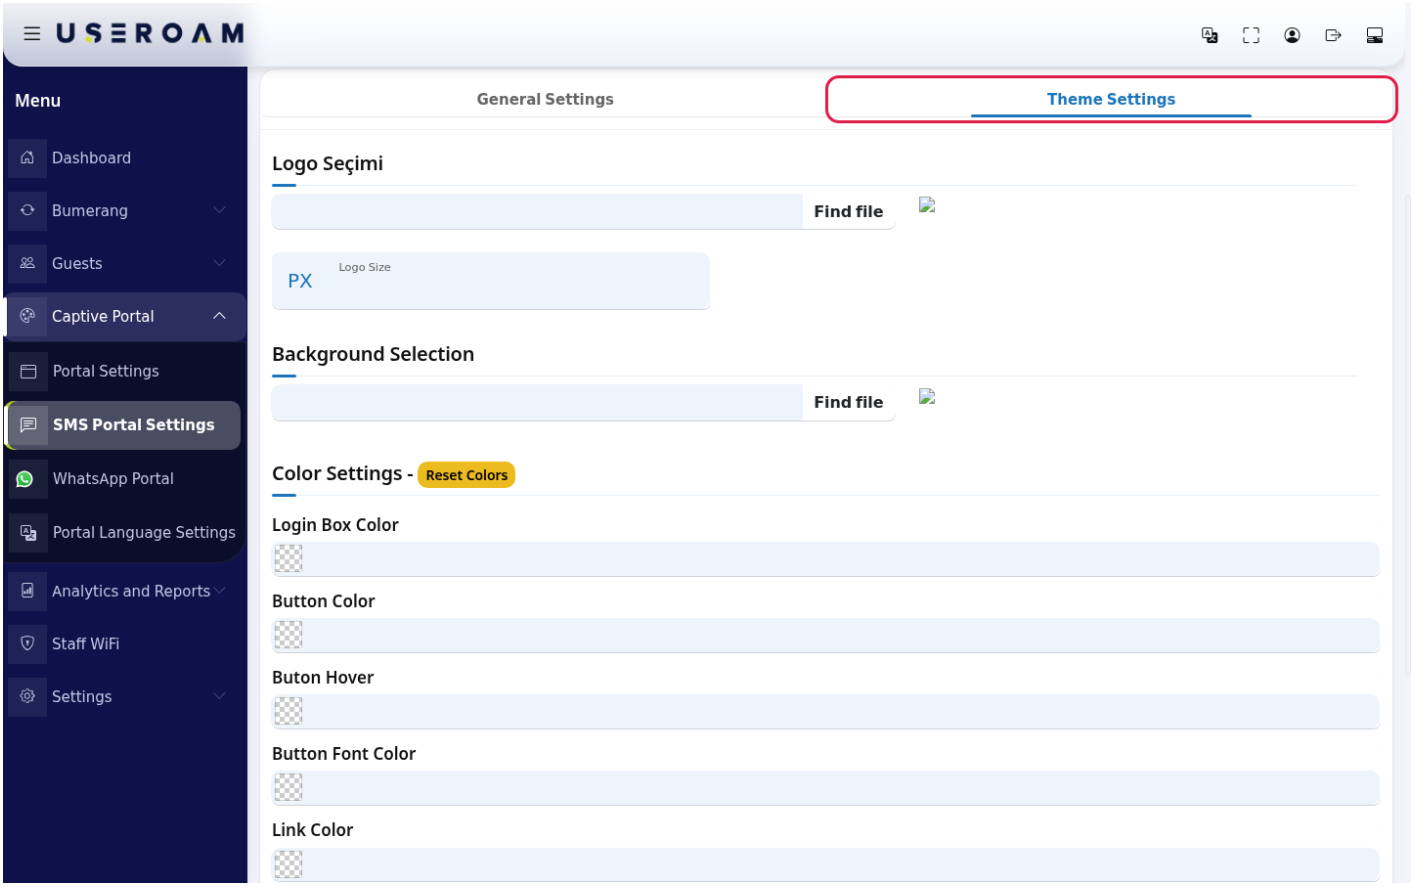

5. Check the login screen in the preview on Portal Settings: the **Register with SMS** button must be visible. Then join the guest network with a real phone and register once; if no SMS arrives, check SMS Settings.

Every field and button on the screen

Field / Button	What it does	Example
SMS Module switch	Turns the Register with SMS button on or off. Saved the moment it changes.	On
General Settings, **Theme Settings**	Two tabs visible while the switch is on.	-
Portal Title	Title for devices that use the old separate sign-up page. On the current login screen the title comes from Portal Settings.	Can stay empty
Registration Screen E-Mail Settings	Show, Show and Required, Do Not Show.	Show
Registration Screen First-Last Name Settings	Show, Show and Required, Do Not Show.	Show and Required
Registration with Coupon	Asks for a coupon code.	Off
E-mail delivery permission	Commercial message consent box. Whether it shows on the login screen depends on the Bumerang licence.	-
Province/District/Neighborhood Selection	Asks for province, district and neighbourhood.	Off
Status	Active, Passive, Waiting for Approval.	Active
Save	Saves General Settings.	-
Theme Settings: **Logo Seçimi** (logo selection; shown in Turkish), **Logo Size**, **Background Selection**, **Color Settings** (**Login Box Color**, **Button Color**, **Button Font Color**, **Link Color**, **Font Color**), **Reset Colors**, **Save**	Only applies to devices that use the old separate sign-up page (e.g. old Cyberoam installations). On Sophos, MikroTik, Fortinet and other current login screens the look comes from Portal Settings → Theme Settings.	-

The SMS form the guest sees

With the module on, the guest taps **Register with SMS**. A country code list and a mobile phone box appear, then depending on your choices first name, last name, e-mail, coupon code, province and district lists and a neighbourhood box. The KVKK consent box is always there. You change these texts and the error messages (e.g. *Please enter a coupon code*, *Coupon code is wrong*) on the screen described in Editing Portal Texts.

Frequently asked questions

I turned the switch on but guests get no SMS.

Check that the message text and group are set on Settings → SMS Settings. Sent SMS messages appear in SMS / WhatsApp Reports.

I pressed Save and no green message appeared.

When the save works, *Successful- Successfully updated* appears above the card. If there is no message and your choices went back to the old values, nothing was saved: reload the page and try again; if it keeps happening, contact our support team.

I set Status to Waiting for Approval. What does the guest see?

The guest sees the waiting-for-approval message. When you approve on Pending Approval, their password is sent.

I turned off E-mail delivery permission but the consent box still appears.
The commercial message consent box on the login screen follows your Bumerang (marketing) licence.

I changed the logo on Theme Settings, the login screen did not change.

On the current login screen the logo and colours come from Portal Settings → Theme Settings. Change them there.
