

Online Menu

What is it for?

Online Menu lists your **digital menus**, opened from the QR code on the table and from the Wi-Fi login page. Here you create a new menu, jump to a menu's editor, report or live page, delete a menu and, for multi-branch venues, make one menu a branch of another. A price change needs no reprint: you update the menu in the panel and the QR stays the same. The subtitle reads "*Your digital menu via QR and captive portal*".

“ **How do I open this screen?** In the **Business** section of the left menu, go to **Restaurant → Menus**. The **Create digital menu** button in the setup wizard also comes here.

When do I use it?

- To create your first QR menu.
- To open a separate menu for breakfast, dinner or the bar.
- When a branch should use the main menu's products (chain menu).
- To take a menu you no longer use offline.

Page layout

Your Menus on the left, the **New Menu** form on the right. With no menus the left card says "No menus on this device yet: create your first menu on the right."

TR is required; other languages can be translated automatically.

+ Create Menu

Each menu card shows:

- A cover picture, a green **Live** or grey **Off** badge top left, and the design name at the bottom (for example *Restoran*).
- The menu name (click to open the editor).
- Eye icon and number: views in the last 30 days. Language icon: the menu's languages (for example *TR EN AR*). Yellow triangle and percentage: translation incomplete; hovering shows "*Translation 14% complete · 104 items missing. Open the menu and press 'Translate missing'.*"
- **Edit** (menu editor), **Report** (menu report), an arrow icon (**View menu**: the guest page in a new tab), a red bin (**Delete menu**).
- **Menu type**: **Standalone menu** or **Branch → main menu name**. A menu that has branches shows a "*Main menu · 2 branches*" badge instead.

Step by step: create a new menu

1. In the **New Menu** card, pick the design that fits your business (the names are shown in Turkish: *Kafe, Restoran, Pastane, Bar / Pub, Otel, Fast Food, Çay Bahçesi, Lüks*; you can change colours and photos later). Type the **Menu name** (for example). Tick the **Languages** to offer (TR is required; other languages can be translated automatically). Click **Create Menu**.

Menu name

Ana Menü

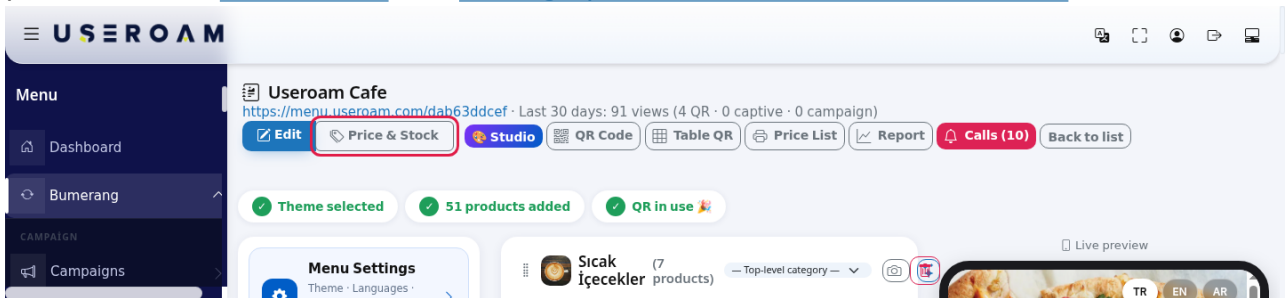

Languages

☒ TR ☐ EN ☐ AR ☐ RU ☐ DE ☐ FA

TR is required; other languages can be translated automatically.

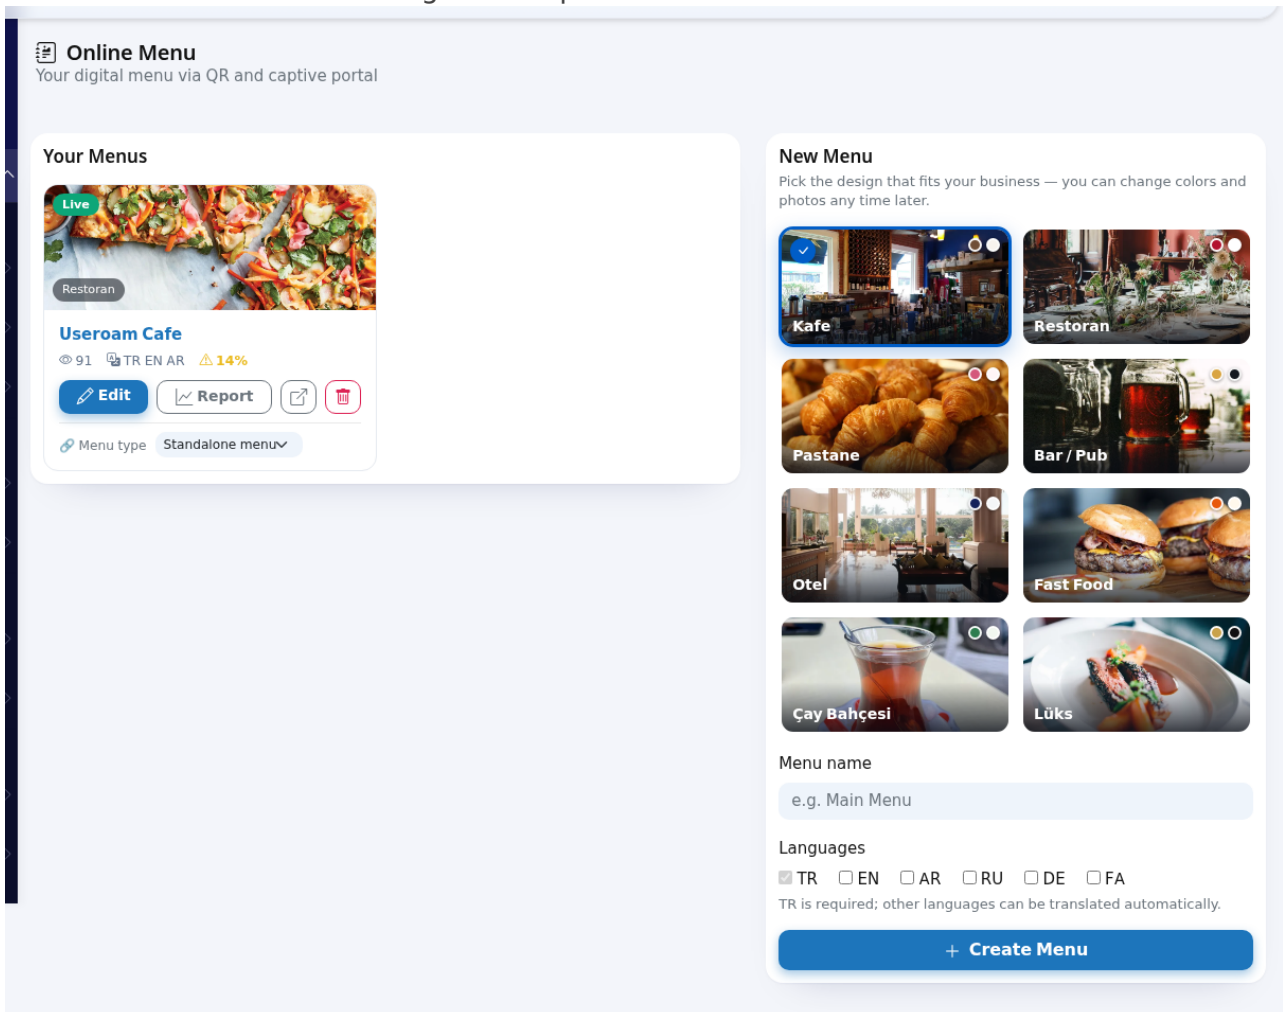

+ Create Menu

2. The menu editor opens. Add sections and items, or import your menu from Excel, PDF or a photo. Details: [Menu Editor](#) and [Setting up the QR menu from start to finish](#).

Step by step: make a menu a branch (chain menu)

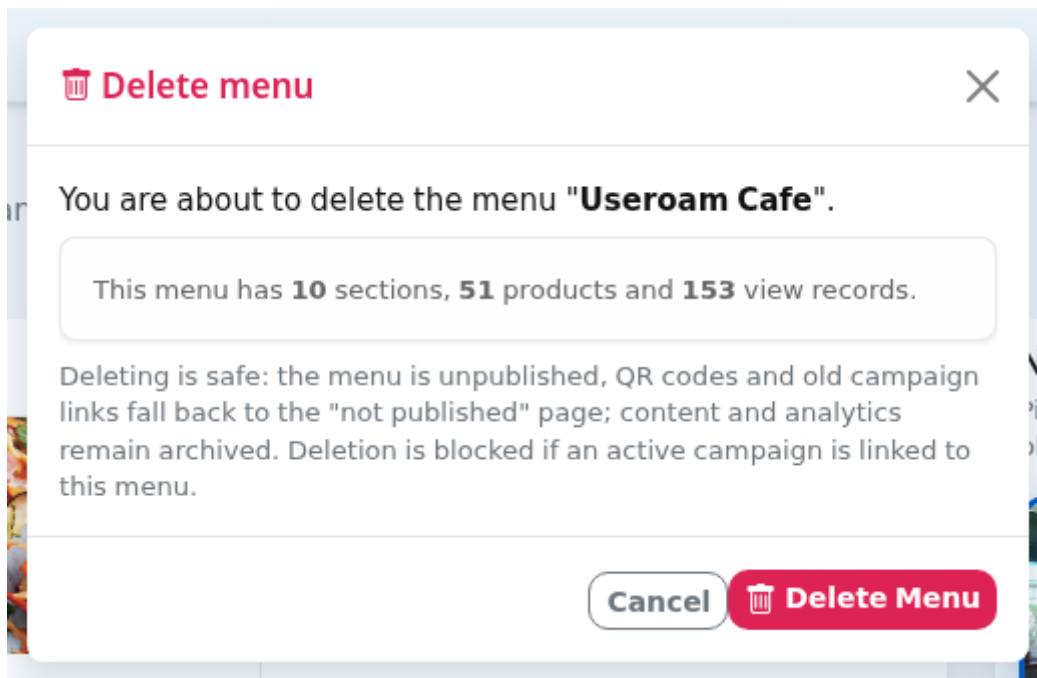

1. On the card of the menu that should become a branch, choose **Branch → main menu name** in **Menu type**. The choice saves by itself. The branch uses the main menu's items; branch-specific price, sold out and hide settings are set in the branch menu's editor. Choose **Standalone menu** again to separate it.

Rules: a menu that has its own branches cannot become a branch; the main menu must be a menu that is not itself a branch.

Step by step: delete a menu

1. Click the red bin on the menu card. The window says "You are about to delete the menu Useroam Cafe.", a content summary ("This menu has 10 sections, 51 products and 76 view records.") and a safety note. Click **Delete Menu** to delete or **Cancel** to go back.

Deleting is safe: the menu goes offline, table QRs and old campaign links fall back to the "not published" page; content and analytics stay archived. If an active Bumerang campaign links to the menu, it is not deleted: *"Could not delete: these active campaigns are linked to this menu: ... Change the campaign link or pause the campaign first."*

Every field and button

Field / Button	What it does	Example
Design tiles	Starting look of the new menu.	Kafe
Menu name	Name of the menu (required).	e.g. Main Menu
Languages	TR, EN, AR, RU, DE, FA. TR is always on.	TR, EN
Create Menu	Creates the menu and opens the editor.	-
Edit / Report	Menu Editor / Menu Report.	-
View menu	Opens the guest page.	-
Delete menu	Opens the delete window.	-
Menu type	Standalone or a branch of a main menu.	Standalone menu

Messages you may see

Message	Meaning and what to do
<i>Menu "Useroam Cafe" was deleted. Old links fall back to the "not published" page; content and analytics remain archived.</i>	Deleted.
<i>Could not delete: these active campaigns are linked to this menu: ...</i>	Change the campaign link or pause the campaign, then try again.
<i>Menu could not be created. / Error: ...</i>	Check the name and try again.
<i>Menu not found. / Could not be deleted.</i>	Refresh the page; the menu may belong to another device.

Other on-screen texts

The hints, counters, waiting and status texts below appear on screen as written (numbers and names are examples; "..." is replaced with your data).

- *Menu "..." was deleted. Old links fall back to the "not published" page; content and analytics remain archived.*
- *Translation ...% complete · ... items missing. Open the menu and press "Translate missing".*
- *Chain menu: you can make this menu a branch of another menu. A branch inherits products from the main menu; price/stock differences are set in the menu editor.*
- *Main menu · ... branches*
- *This menu has ... sections, ... products and ... view records.*
- *Your QR menu*
- *A summary of your menu. Open the editor with Edit, or get the print-ready QR code.*
- *Create a new menu here: automatic import from your PDF menu is also available.*

Frequently asked questions

I deleted a menu. What does the table QR show?

The "not published" page. To hide a menu for a while, do not delete it; turn off **Menu Settings** → **Menu published** in the editor instead.

Can my menu appear on the Wi-Fi login page?

Yes: turn on **Menu Settings** → **Show Menu button on the Wi-Fi login page** in the editor.

What does the yellow percentage mean?

The translation into your chosen languages is incomplete. Click **Translate missing** in the editor's **Tools** card.
